"In 1939, Steinbeck's 'The Grapes of Wrath' blew the lid off the problem of American migratory labor. Before the disturbing picture presented by that book could be brushed aside as fiction, Carey McWilliams' 'Factories in the Field' (283 M252) appeared to buttress it at every point with facts as devastating as Mr. Steinbeck's story of the Joads. Both those books left most of the country feeling that these conditions were peculiarly Californian. This new book will blast away that complacency."

This is such an outstanding book on nutrition that some college courses on foods use it as required reading but the author's style is so informal that it is very readable. TOO BUSY TO READ\*

An hour with a book would have brought to his mind  
The secret that took him a whole year to find.  
The facts that he learned at enormous expense  
Were all on a library shelf to commence.  
Alas! for our hero; too busy to read,  
He was also too busy, it proved, to succeed.  
We may win without credit, or backing or style,  
Without patience or aptitude, purpose or wit -  
We may even succeed if we are lacking in grit;  
But take it from me as a mighty safe hint,  
A civilized man cannot win without print.
